

Competitive Intelligence Dossier

inGen Dynamics — Service Robotics Portfolio · Week 2

15 priority competitors across five verticals (Fari, Senpai, Sentinel Prime AI, Aido Rover, Aido Humanoid), profiled on positioning, partnerships, hiring-signal method, and **real patent activity**. One page per peer follows the two-page executive summary (issued separately).

Prepared by Ziheng Wang · Retrieved 2026-05-31 · All figures from public sources; verify funding/headcounts before external use.

Intuition Robotics (ElliQ)

Eldercare · vs InGen Fari · Palo Alto, CA, USA · founded 2016

Priority: High

Positioning

Tagline	Proactive AI care companion for older adults
Top claims	Companionship; proactive engagement; wellness check-ins; caregiver app (ElliQ Caregiver Solution)
Target customer	Older adults aging in place; families; aging-services agencies; care organizations
Partnerships	State aging agencies (e.g., NY State Office for the Aging deployment); Toyota (Woven Capital investor)
Recent signal	ElliQ 3 with generative AI; ElliQ Caregiver Solution launched Jan 2025
Website	elliq.com

Patent Activity (real data)

Assignee key	Intuition Robotics, Ltd.
Technology area	Companion AI / human-robot interaction / emotional gestures
Specific patents	Emotional-gesture device patent (electro-mechanical expressive body); social-agent action/response method (US filings)
Portfolio activity	Active assignee portfolio on Justia; HRI and proactive-dialogue focus
Verify	Confirm exact 36-month grant count and numbers in PatentsView by assignee 'Intuition Robotics'.

R&D Scale (real headcount + IP)

Employees	~74 (as of 2025)
Source	RocketReach/CB Insights; LinkedIn ~8.8k followers
Scale read	Small, focused team with real HRI patent portfolio — IP-per-head is high for eldercare.

Why selected vs InGen Fari

Closest direct peer to Fari on eldercare companionship and social engagement; same tabletop companion form factor.

Peer 1 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Labrador Systems

Eldercare · vs InGen Fari · Calabasas, CA, USA · founded 2017

Priority: High

Positioning

Tagline	Assistive home robot for everyday independence
Top claims	Mobile assistive robot; household item transport; independence support; caregiver-burden reduction
Target customer	Older adults, people with mobility limitations, caregivers
Partnerships	Amazon Alexa Fund (investor); healthcare/assistive-technology ecosystem references
Recent signal	Labrador Retriever positioned around physical assistance vs conversation-first companionship
Website	labradorsystems.com

Patent Activity (real data)

Assignee key	Labrador Systems, Inc.
Technology area	Assistive mobility / household item transport / manipulation
Specific patents	Assistive-robot transport and navigation filings (verify specific numbers)
Portfolio activity	Small early-stage portfolio; episodic filing expected
Verify	Confirm via PatentsView; portfolio is small relative to peers.

R&D Scale (real headcount + IP)

Employees	~15-30 (small; 3 execs listed) (as of 2025)
Source	CB Insights (3 execs); LinkedIn ~1.2k followers
Scale read	Very small team; early-stage; physical-assistance focus over breadth.

Why selected vs InGen Fari

Eldercare peer attacking the same demographic from a physical-assistance angle, complementary to Fari's engagement focus.

Peer 2 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

OhmniLabs

Eldercare · vs InGen Fari · Santa Clara, CA, USA · founded 2015

Priority: Medium

Positioning

Tagline	Telepresence robots connecting people remotely
Top claims	Telepresence; remote family/clinician connection; autonomous navigation
Target customer	Seniors in assisted living; families; healthcare providers
Partnerships	Healthcare and senior-living channel references
Recent signal	Telepresence positioning adjacent to eldercare connection use cases
Website	ohmnilabs.com

Patent Activity (real data)

Assignee key	OhmniLabs, Inc.
Technology area	Telepresence / autonomous navigation / modular robotics
Specific patents	Telepresence and navigation filings (verify specific numbers)
Portfolio activity	Modest portfolio; telepresence-centric
Verify	Confirm via PatentsView; verify recent activity.

R&D Scale (real headcount + IP)

Employees	~30-60 (as of 2025)
Source	RocketReach; LinkedIn ~8k followers
Scale read	Small team; telepresence + additive-manufacturing niche.

Why selected vs InGen Fari

Relevant to Fari's connection/engagement dimension via remote-presence, a different technical path to the same loneliness problem.

Peer 3 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Miko (Emotix)

Education · vs InGen Senpai · Mumbai, India · founded 2015

Priority: High

Positioning

Tagline	AI learning companion robot for children
Top claims	Conversational learning; child engagement; educational content ecosystem
Target customer	Children, parents, families, learning platforms
Partnerships	Content and app ecosystem; consumer retail distribution
Recent signal	Consumer-facing learning robot positioned around children and education
Website	miko.ai

Patent Activity (real data)

Assignee key	Miko / RN Chidakashi Technologies
Technology area	Conversational AI / child interaction / education content
Specific patents	Child-facing conversational-robot filings (largely India/IN; verify US coverage)
Portfolio activity	Filing skewed to India; limited US presence expected
Verify	Check both IN and US offices; US coverage may be thin.

R&D Scale (real headcount + IP)

Employees	~200-300 (as of 2025)
Source	CB Insights/Crunchbase (Emotix)
Scale read	Mid-size consumer team; content + conversational-AI weighted; IP skewed to India.

Why selected vs InGen Senpai

Direct peer for Senpai on AI learning companion and child-facing robotics; strongest consumer-education overlap.

Peer 4 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

UBTECH Robotics

Education · vs InGen Senpai · Shenzhen, China · founded 2012

Priority: High

Positioning

Tagline	AI and humanoid robotics across education and service
Top claims	Humanoid + educational robot kits; AI curriculum; school programs; full-stack IP
Target customer	Schools, robotics labs, STEM programs; also service/humanoid markets
Partnerships	DeepSeek partnership (Feb 2025) for embodied reasoning models; public on HKEX
Recent signal	Walker humanoid series; 2,100+ patents; bridges education and humanoid
Website	ubtrobot.com

Patent Activity (real data)

Assignee key	UBTECH ROBOTICS CORP / CORP LTD
Technology area	Humanoid control / locomotion / multi-sensor fusion / HRI
Specific patents	Dynamic target-tracking method (multi-joint); biped walking-control method; recharge-docking method; US9979862B1 (most-cited)
Portfolio activity	Very large: 3,000+ patents globally, 1,500+ granted; ~310 USPTO applications; top-tier humanoid assignee
Verify	One of the strongest IP positions in the entire peer set (per PatentVest/GreyB).

R&D Scale (real headcount + IP)

Employees	~1,000 (as of Jul 2025)
Source	LeadIQ; HKEX-listed (9880.HK)
Scale read	Large team AND 3,000+ patents — among the strongest combined scale+IP positions in the set.

Why selected vs InGen Senpai

Comparator for Senpai where education robotics meets a deep humanoid/AI portfolio and very strong IP.

Peer 5 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

LEGO Education

Education · vs InGen Senpai · Billund, Denmark · founded 1980

Priority: Medium

Positioning

Tagline	Hands-on STEAM learning through LEGO systems
Top claims	Classroom robotics; curriculum-aligned learning; teacher resources
Target customer	K-12 schools, teachers, districts, STEM programs
Partnerships	Worldwide school and curriculum distribution; part of LEGO Group
Recent signal	Established SPIKE Prime / education robotics line with deep classroom channel
Website	education.lego.com

Patent Activity (real data)

Assignee key	LEGO A/S (education line)
Technology area	Modular learning systems / programmable robotics / sensors
Specific patents	Programmable-brick and modular-robotics filings under LEGO A/S (verify education-specific numbers)
Portfolio activity	Large parent portfolio; education-robotics subset harder to isolate
Verify	Education-specific filings sit within the broader LEGO A/S portfolio.

R&D Scale (real headcount + IP)

Employees	part of LEGO Group (~28,000 group-wide) (as of 2025)
Source	LEGO Group reports (division not broken out)
Scale read	Embedded in a very large parent; education-robotics is a division, not a standalone scale signal.

Why selected vs InGen Senpai

Incumbent benchmark for Senpai on classroom procurement, curriculum integration and brand trust.

Peer 6 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Knightscope

Indoor Security · vs InGen Sentinel Prime AI · Sunnyvale, CA, USA · founded 2013

Priority: High

Positioning

Tagline	Autonomous security robots and public-safety technology
Top claims	Autonomous patrol (ASR); security monitoring; emergency communication devices; MaaS
Target customer	Commercial facilities, campuses, property owners, public safety
Partnerships	Authorized provider/integrator network; public company (NASDAQ: KSCP)
Recent signal	K7 outdoor ASR unveiled Nov 2025; continued MaaS subscription growth
Website	knightscope.com

Patent Activity (real data)

Assignee key	KNIGHTSCOPE, INC.
Technology area	Autonomous data machines / patrol autonomy / parking monitoring / security analytics
Specific patents	US 9,329,597 'Autonomous Data Machines and Systems'; parking-monitor and security-data-analysis filings; multiple provisionals (per SEC)
Portfolio activity	Active assignee portfolio on Justia; core ADM patent plus follow-ons
Verify	Public-company filings; cross-check 10-K IP section for current count.

R&D Scale (real headcount + IP)

Employees	71 → 400+ (rapid 2026 expansion) (as of Dec 2024 → Mar 2026)
Source	SEC 10-K FY2024; BusinessWire Mar 2026
Scale read	Headcount quadrupled to 400+ in early 2026, but mostly security agents (services), not R&D; — read carefully.

Why selected vs InGen Sentinel Prime AI

Direct peer for Sentinel Prime AI and Aido Rover; most visible public-market security-robotics comparable.

Peer 7 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Cobalt Robotics

Indoor Security · vs InGen Sentinel Prime AI · San Mateo, CA, USA · founded 2016

Priority: High

Positioning

Tagline	Indoor security robots as a service with human-in-the-loop
Top claims	Indoor patrol; anomaly detection; remote human specialists; access/badge checks
Target customer	Offices, enterprise facilities, security teams
Partnerships	Sequoia, Coatue, Bloomberg Beta (investors)
Recent signal	Human-in-the-loop robot security service model; ~\$51M raised
Website	cobaltrobotics.com

Patent Activity (real data)

Assignee key	Cobalt Robotics Inc.
Technology area	Indoor security patrol / semantic mapping / RFID/anomaly detection / mobile manipulation
Specific patents	Mobile-robot security-policy-violation detection patent; rotatable-ring mechanical-arm robot (door/elevator interaction); ~27 patents filed
Portfolio activity	Focused indoor-security portfolio (~27 filings per CB Insights)
Verify	Acquired status — confirm current assignee after acquisition.

R&D Scale (real headcount + IP)

Employees	~91 (acquired) (as of 2025)
Source	Growjo/CB Insights; status: acquired
Scale read	Mid-size, acquired; ~27 patents; indoor-security-focused.

Why selected vs InGen Sentinel Prime AI

Closest indoor-security analogue to Sentinel Prime AI; the human-in-the-loop model is a useful contrast point.

Peer 8 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

RAD (AITX)

Indoor Security · vs InGen Sentinel Prime AI · Ferndale, MI, USA · founded 2016

Priority: Medium

Positioning

Tagline	AI-driven security devices and autonomous response
Top claims	ROAMEO/SCOT/ROSA security devices; guarding and response; subscription model
Target customer	Security integrators, facilities, enterprises
Partnerships	Public parent Artificial Intelligence Technology Solutions (OTC: AITX)
Recent signal	Broad device portfolio for guarding/response; recurring-revenue push
Website	roboticassisteddevices.com

Patent Activity (real data)

Assignee key	Robotic Assistance Devices / AITX
Technology area	Security devices / autonomous response / remote monitoring
Specific patents	Security-device and monitoring filings under AITX entities (verify specific numbers)
Portfolio activity	Portfolio under public parent AITX; verify scope
Verify	Check AITX SEC filings for IP disclosures.

R&D Scale (real headcount + IP)

Employees	~100-150 (AITX group) (as of 2025)
Source	AITX filings (OTC: AITX)
Scale read	Small public-group; breadth of security devices over deep R&D; headcount.

Why selected vs InGen Sentinel Prime AI

Security-hardware breadth comparable to InGen's security ambitions; public micro-cap with disclosure to mine.

Peer 9 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Asylon Robotics

Outdoor Patrol · vs InGen Aido Rover · Philadelphia, PA, USA · founded 2015

Priority: High

Positioning

Tagline	Drone + ground robotics for perimeter security
Top claims	DroneDog quadruped; dock-launched drones; automated perimeter operations
Target customer	Critical infrastructure, campuses, industrial sites
Partnerships	DoD-adjacent and enterprise security references
Recent signal	Series B ~\$26M (Jul 2025); combines ground robotics and drone docking
Website	asylonrobotics.com

Patent Activity (real data)

Assignee key	Asylon, Inc.
Technology area	Perimeter robotics / drone docking / autonomous security operations
Specific patents	Drone-docking and automated-perimeter-operations filings (verify specific numbers)
Portfolio activity	Growing portfolio aligned with drone+ground security
Verify	Confirm via PatentsView; verify recent grants.

R&D Scale (real headcount + IP)

Employees	~50-100 (as of 2025)
Source	CB Insights; Series B Jul 2025
Scale read	Small-mid team; multi-modal (ground+air) focus; growing post-Series B.

Why selected vs InGen Aido Rover

Closest peer to Aido Rover on outdoor perimeter security; multi-modal (ground+air) is a strategic contrast.

Peer 10 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Boston Dynamics (Spot)

Outdoor Patrol · vs InGen Aido Rover · Waltham, MA, USA · founded 1992

Priority: High

Positioning

Tagline	Quadruped robot for inspection, security and industry
Top claims	Spot quadruped; autonomy; inspection payloads; rugged mobility
Target customer	Industrial, public safety, inspection teams
Partnerships	Hyundai (owner); large integrator/developer ecosystem
Recent signal	Electric Atlas program; deep legged-locomotion patent portfolio
Website	bostondynamics.com

Patent Activity (real data)

Assignee key	Boston Dynamics, Inc.
Technology area	Legged locomotion / balance & gait control / actuators / footstep detection
Specific patents	US 10,266,220 (ordered gait controllers); US 10,253,855 / US20180172121A1 (screw actuator for legged robot); footstep-contact-detection method; robot-leg assemblies
Portfolio activity	Deep, sustained portfolio — one of the strongest legged-robotics moats globally
Verify	Deepest patent moat in the set; many grants across locomotion and actuation.

R&D Scale (real headcount + IP)

Employees	~1,440 (as of Dec 2025)
Source	Revelio Labs; subsidiary of Hyundai
Scale read	Large team + deepest legged-robotics patent moat — top combined scale+IP in the set.

Why selected vs InGen Aido Rover

Best-known legged platform; benchmark for Aido Rover on outdoor mobility and the deepest patent moat in the set.

Peer 11 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

ANYbotics

Outdoor Patrol · vs InGen Aido Rover · Zurich, Switzerland · founded 2016

Priority: Medium

Positioning

Tagline	Autonomous inspection for industrial sites
Top claims	ANYmal quadruped; harsh-environment inspection; autonomy + analytics
Target customer	Energy, industrial, mining, chemical sites
Partnerships	Industrial energy/utility deployments; Series B ~\$60M (2024)
Recent signal	Industrial inspection focus; expanding deployments
Website	anybotics.com

Patent Activity (real data)

Assignee key	ANYbotics AG
Technology area	Legged inspection robots / autonomy / locomotion
Specific patents	Legged-inspection and autonomy filings (verify specific numbers)
Portfolio activity	Industrial-inspection-focused portfolio; ETH Zurich research lineage
Verify	Confirm via Espacenet/PatentsView; strong research heritage.

R&D Scale (real headcount + IP)

Employees	~150 (as of 2025)
Source	Wikipedia (ANYbotics)
Scale read	Mid-size ETH-Zurich-spinout team; industrial-inspection R&D; focus.

Why selected vs InGen Aido Rover

Industrial-inspection adjacency to Aido Rover; shows the inspection-vs-security positioning split in outdoor robotics.

Peer 12 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Figure AI

Humanoid · vs InGen Aido Humanoid · Sunnyvale, CA, USA · founded 2022

Priority: High

Positioning

Tagline	General-purpose humanoid for labor-intensive work
Top claims	Figure humanoid; AI partnerships; logistics/manufacturing tasks; home roadmap
Target customer	Manufacturing, logistics, enterprise automation; future home
Partnerships	High-profile AI/OEM partnerships; very large funding rounds reported
Recent signal	Among the best-funded humanoid startups; flagship demos
Website	figure.ai

Patent Activity (real data)

Assignee key	Figure AI Inc.
Technology area	Humanoid manipulation / perception / task learning
Specific patents	Limited granted-patent footprint relative to funding (per PatentVest landscape)
Portfolio activity	IP-light vs capital: 'most capital, least defensible IP' (PatentVest); reliant on vision/demos
Verify	Key insight: funding hugely outpaces defensible IP — strategic caution for InGen benchmarking.

R&D Scale (real headcount + IP)

Employees	~180 (as of late 2025)
Source	Wikipedia (Figure AI)
Scale read	Mid-size team, very large funding, but IP-light (PatentVest) — capital >> defensible R&D; output so far.

Why selected vs InGen Aido Humanoid

Direct peer for Aido Humanoid and the clearest case of capital >> IP — a key strategic lesson for InGen.

Peer 13 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Agility Robotics

Humanoid · vs InGen Aido Humanoid · Salem, OR, USA · founded 2015

Priority: High

Positioning

Tagline	Digit humanoid for logistics and manufacturing
Top claims	Digit bipedal humanoid; warehouse material handling; commercial deployment
Target customer	Warehouses, manufacturing, distribution centers
Partnerships	Ford (early Digit pilot); logistics customers
Recent signal	Commercial humanoid deployment focus; real bipedal-locomotion patents
Website	agilityrobotics.com

Patent Activity (real data)

Assignee key	AGILITY ROBOTICS, INC.
Technology area	Bipedal locomotion / impact reduction / manipulation / tote handling
Specific patents	US 11,928,638 (bipedal locomotion/balance); D888120 (Digit design patent); US20220144358A1 (object handling); nonprehensile tote-handling method
Portfolio activity	Genuine locomotion + handling portfolio; OSU research lineage (Cassie→Digit)
Verify	Real, defensible locomotion IP — contrast with Figure's IP-light position.

R&D Scale (real headcount + IP)

Employees	~400 (as of 2025)
Source	TrueUp; The Robot Report
Scale read	~400-person team with genuine locomotion IP — balanced scale + defensibility.

Why selected vs InGen Aido Humanoid

Direct peer for Aido Humanoid with the clearest logistics use case and genuine locomotion IP.

Peer 14 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.

Unitree Robotics

Humanoid · vs InGen Aido Humanoid · Hangzhou, China · founded 2016

Priority: Medium

Positioning

Tagline	Low-cost quadruped and humanoid hardware
Top claims	G1/H1 humanoids; Go2/B2 quadrupeds; aggressive pricing
Target customer	Developers, research, commercial robotics buyers
Partnerships	Broad developer ecosystem; pre-IPO (2025) reports
Recent signal	Aggressive hardware pricing; visible humanoid + quadruped portfolio
Website	unitree.com

Patent Activity (real data)

Assignee key	Unitree Robotics
Technology area	Legged motion / actuation / low-cost robot hardware
Specific patents	Legged-motion and actuation filings (largely CN; verify US coverage)
Portfolio activity	Portfolio skewed to China; hardware/actuation focus
Verify	Check CN + US offices; cost-driven hardware IP.

R&D Scale (real headcount + IP)

Employees	~40 (per TrueUp) — likely understated; large CN ops (as of 2025)
Source	TrueUp; verify CN headcount
Scale read	Reported small headcount understates large China ops; hardware/cost-driven.

Why selected vs InGen Aido Humanoid

Comparator for Aido Humanoid on cost positioning; also overlaps Aido Rover via quadrupeds.

Peer 15 of 15 · Sources (public): company sites & careers pages; Justia Patents (assignee search); Google Patents; USPTO PatentsView; GreyB and PatentVest patent-landscape analyses; CB Insights; SEC/EDGAR; TechCrunch; The Robot Report. Retrieved 2026-05-31. Patent numbers shown are real and locatable via the cited sources. Prepared by Ziheng Wang, inGen Data Analyst internship — Week 2.
