

Fari: Product Profile

AI eldercare companion robot designed around social engagement, reminders, and supportive daily interaction.

Field	Summary
Vertical	Eldercare / assisted living robotics
Target customer	Older adults, families, senior-living operators, care teams, aging-services organizations.
Problem addressed	Loneliness, caregiver capacity constraints, routine check-ins, engagement, and home-based support needs.
Claimed differentiation	Human-centered companion use case connected to InGen physical-intelligence ecosystem; should be presented as design intent unless independently validated.
Visible pricing / distribution	No clear public pricing found in reviewed official materials; likely partnership, pilot, or B2B/B2C rollout dependent.
Analytics hook	Aging demographics, eldercare labor shortage, assisted-living counts, Medicare/Medicaid spending, loneliness and wellbeing evidence.
Primary public sources	https://www.ingendynamics.com/ ; https://www.arshadhisham.com/ ; https://elliq.com/ ; https://aging.ny.gov/news/nysofas-rollout-ai-companion-robot-elliq-shows-95-reduction-loneliness

Caution: product maturity, pricing, and deployment status should be verified through primary company materials before being used for external strategy or investor-facing claims.

Senpai: Product Profile

AI educational robot platform for interactive AI, robotics, and STEM learning.

Field	Summary
Vertical	Education robotics / AI literacy
Target customer	K-12 schools, STEM programs, families, special-needs learning environments, tutoring or enrichment programs.
Problem addressed	Student engagement, AI literacy access, teacher capacity, hands-on STEM learning, and special-needs support.
Claimed differentiation	Robot-based learning experience tied to Futurenauts education ecosystem and InGen product narrative.
Visible pricing / distribution	No public pricing confirmed; likely education programs, kits, school pilots, or institutional partnerships.
Analytics hook	K-12 enrollment, EdTech spend, STEM funding, district procurement, special education services, robotics curriculum adoption.
Primary public sources	https://www.ingendynamics.com/ ; https://futurenauts.org/ ; https://www.miko.ai/ ; https://education.lego.com/

Caution: product maturity, pricing, and deployment status should be verified through primary company materials before being used for external strategy or investor-facing claims.

Sentinel Prime AI / Sentinel: Product Profile

AI security intelligence platform for monitoring, event awareness, and facility response support.

Field	Summary
Vertical	Indoor security / surveillance intelligence
Target customer	Enterprises, campuses, commercial buildings, smart-home environments, security operations teams.
Problem addressed	Monitoring overload, noisy alerts, fragmented sensor feeds, time-sensitive response decisions.
Claimed differentiation	Company materials position it as operational and revenue-generating; all deployment and field-hour claims should remain company-reported.
Visible pricing / distribution	Public pricing not clearly available; likely B2B security platform or enterprise deployment model.
Analytics hook	Physical-security spend, guard labor costs, incident datasets, anomaly-detection benchmarks, facilities footprint.
Primary public sources	https://www.ingendynamics.com/ ; https://www.arshadhisham.com/ ; https://www.knightscope.com/ ; https://www.cobaltrobotics.com/

Caution: product maturity, pricing, and deployment status should be verified through primary company materials before being used for external strategy or investor-facing claims.

Aido Rover: Product Profile

Outdoor patrol and perimeter robotics direction, adjacent to security, inspection, and facility monitoring.

Field	Summary
Vertical	Outdoor patrol / perimeter robotics
Target customer	Campuses, warehouses, logistics sites, industrial perimeters, security contractors, facilities teams.
Problem addressed	Perimeter monitoring, patrol coverage, inspection consistency, outdoor security staffing constraints.
Claimed differentiation	Part of a broader InGen product ecosystem rather than a standalone patrol robot only.
Visible pricing / distribution	No public pricing confirmed; likely pilot, enterprise, or robotics-as-a-service model depending on deployment.
Analytics hook	Warehouse footprint, campus security spend, drone-vs-ground-robot benchmarks, outdoor incident datasets.
Primary public sources	https://www.ingendynamics.com/ ; https://www.asylonrobotics.com/ ; https://www.bostondynamics.com/products/spot ; https://www.anybotics.com/

Caution: product maturity, pricing, and deployment status should be verified through primary company materials before being used for external strategy or investor-facing claims.

Aido Humanoid: Product Profile

Longer-horizon humanoid robotics ambition within the InGen physical AI portfolio.

Field	Summary
Vertical	General-purpose humanoid robotics
Target customer	Future enterprise, logistics, service, healthcare, and industrial automation buyers depending on maturity.
Problem addressed	Labor capacity, repetitive work, human-scale environments, and general physical automation.
Claimed differentiation	Should be framed as frontier roadmap ambition and product direction, not guaranteed commercial maturity.
Visible pricing / distribution	No public pricing confirmed; peer market ranges vary widely and should be treated cautiously.
Analytics hook	Humanoid venture funding, peer benchmarks, unit shipment guidance, labor cost substitution, robotics-AI foundation model releases.
Primary public sources	https://www.ingendynamics.com/ ; https://www.figure.ai/ ; https://www.agilityrobotics.com/ ; https://www.tesla.com/AI ; https://www.unitree.com/

Caution: product maturity, pricing, and deployment status should be verified through primary company materials before being used for external strategy or investor-facing claims.

Origami AI / PIC 2.0: Product Profile

Shared intelligence layer intended to connect multiple InGen robotics and automation products.

Field	Summary
Vertical	Physical Intelligence Platform
Target customer	Internal product ecosystem, developers, partners, and potentially enterprise platform users.
Problem addressed	Fragmented product intelligence, lack of reusable AI architecture, cross-product learning and deployment complexity.
Claimed differentiation	Positioned as the connective platform behind the product portfolio; platform scalability remains a forward-looking claim.
Visible pricing / distribution	No public pricing confirmed; public materials position it as a core platform rather than a conventional standalone SKU.
Analytics hook	Foundation model release cadence, robotics-AI publications, simulation toolchains, EU AI Act timelines, platform adoption signals.
Primary public sources	https://www.ingendynamics.com/ ; https://www.arshadhisham.com/ ; https://arxiv.org/ ; https://openalex.org/ ; https://artificialintelligenceact.eu/

Caution: product maturity, pricing, and deployment status should be verified through primary company materials before being used for external strategy or investor-facing claims.
